OBJECTIVE

Motivated **Engineering student** with strong foundations in **data analysis, programming, and problem-solving**. Seeking an **Intern – Fab Engineering** position at **GlobalFoundries** to apply my skills in **data analytics, process monitoring**, and **automation** while contributing to semiconductor manufacturing operations. Eager to support the Fab engineering team in optimizing process control and improving manufacturing efficiency.

EDUCATION

B.E, Bangalore Institute of Technology   Expected 2025
Information Science, CGPA-8.58

Pre-University, Jain College   2019 - 2021
PCMC, Aggregate - 86%

SKILLS

Technical Skills	Python, C, Java, HTML, CSS, JavaScript, SQL
	Microsoft Office (Excel, Word, PowerPoint), Data Analytics
Core Competencies & Frameworks	Django, Flask, Object-Oriented Programming, DSA, OS
	Data Mining, Statistical Process Control (SPC), Scripting (Python)
Soft Skills	Communication, Teamwork, Problem-Solving, Adaptability,
	Public Speaking, Webinar Tools

PROJECTS

AATC Portal. EEngineered a **Django-powered web portal** used by over 10,000 students and staff for seamless access to results, session details, and feedback submission. Improved academic engagement through streamlined data integration and accessibility. [(GitHub)](#)

Book Delivery System. Developed a **PHP-based book delivery system** with functionalities for efficient order management and delivery tracking. [(GitHub)](#)

Review System. Built a sentiment analysis tool using **NLP** to classify restaurant reviews as positive or negative. Deployed a real-time app using **Streamlit** for user interaction. [(GitHub)](#)

Courier Service System. Spearheaded the development of a **feature-rich courier application** using web technologies. Improved delivery tracking efficiency, resulting in a 30% increase in customer satisfaction. [(GitHub)](#)

EXPERIENCE

Full Stack Web Developer Intern   Sep 2023 - Nov 2023
Prinston Smart Engineers   *Bangalore, India*

- Enhanced functionality of the **Book Delivery System** by streamlining operations and ensuring seamless user experience.
- Engineered dynamic, responsive web solutions to improve website performance, usability, and cross-browser compatibility.
- Developed scripts to automate backend processes, reducing manual intervention by 40%.

CERTIFICATION AND TRAINING

1. [1st Place - CRASH CODE Coding Competition at BIT](#) , b. [Python Complete DSA in Udemy](#) , c. [Full Stack Web Development Internship at Prinston](#) , d. [Python and Django Framework in SpringBoard.](#)
